Retail Sales Insights – Key Findings & Recommendations

Section 1: Key Revenue Growth Opportunities

- Revenue is highly seasonal, with Q4 contributing the largest share.
- Several product categories show high sales volume but low net revenue, indicating pricing inefficiencies.
- Weekend sales underperform weekdays, highlighting untapped revenue potential.
- High discount levels at certain stores do not consistently translate into higher net revenue.

Section 2: Top 3 Business Recommendations

1. Strengthen peak-season strategy by prioritizing inventory and high-margin promotions during Q4 and festive months.
2. Optimize pricing and discounting for high-volume categories to improve average order value and profitability.
3. Introduce weekend specific campaigns to improve sales contribution during low-performing periods.
